

# LEARN THE BACCHUS MANOEUVRE

*If someone passes out, try to wake them.  
If they don't respond:*

- Check for a pulse
- Make sure the person is breathing
- Use the BACCUS MANOEUVRE
- Stay with the person. Have someone call 911 and return until help arrives
- If you are alone, call 911 and return until help arrives
- Notify the teen's parents or guardian as soon as possible
- Even if the person is not unconscious but is impaired, they must not be left alone as the risk is high for injuries
- Give **NOTHING** by mouth (no coffee, food...) to prevent choking
- Do not let the person **SLEEP** if off. He or she could die in his/her sleep
